

Variphy can assist with your migration to a cloud calling platform.

Seamless Migration to Cloud Calling with Variphy

The migration from on-premises to cloud calling can be full of challenges: determining costs, maintaining visibility into your call data, and ensuring adoption. Throughout the process, Variphy can help you save money on licensing and maintenance costs and give you insight into your environments so you can make data-driven decisions.

Pre-Migration Benefits:

- Determine physical phone cloud compatibility and readiness.
- Assess hunt group configurations, resource staffing, and usage statistics.
- Choose the correct calling plans needed by each user.
- Identify trending CUCM, carrier, and site capacity utilization.
- Find dormant phones, users, DNs, and DIDs.
- View usage on DID, phone models, DNs, and users.

During Migration Benefits:

- Export as-built reports for compliance.
- Measure adoption while maintaining visibility of CUCM usage.
- Report on multiple calling platforms at the same time in the same application.
- Confirm and document changes in CUCM.
- Identify who is making or has made a change in CUCM.
- Validate call volume and call flow in your new environment.

Post-Migration Benefits:

- Use analytics on your old and new systems.
- Automate reports to validate or identify changes in call volume.
- Retain data of CUCM configuration.
- Monitor user adoption and calling license utilization.
- Get hybrid UC environment support.

Terms: This offer includes a 180-day license of the Variphy application and support for unlimited phones.
